## CBT022

remember that we use input.txt for keyboard inputs

[Test Case 1](#) [Test Case 2](#) [Test Case 3](#)

Console

```
1 Which month? (1-12)
2 30 days hath April
3
```

Input Files

[input.txt](#)

Help

Java 8

Run Code

```
1 import java.util.Scanner;
2 import java.io.File;
3 import java.io.FileNotFoundException;
4
5 public class Main
6 {
7     public static void main(String[] args) throws FileNotFoundException
8     {
9         File input = new File("input.txt");
10        Scanner key = new Scanner(input);
11
12        int month, days;
13        String monthName;
14
15        System.out.println("Which month? (1-12) ");
16        month = key.nextInt();
17
18        switch(month)
19        {
20            case 1: monthName = "January";
21            break;
```
