Loop Lab 1

Write a program that takes an input.txt file with a number that tells you how many test cases there will be, then there will be strings, you must find all the vowels and print out all the vowels in the order that you find them. Ys are not vowels.

[Test Case 1](#) [Test Case 2](#)

Console

```
1  EOO
2  ADUEEEEEIAEOE
3
```

Input Files

[Input.txt](#)
