CBT008

If you have issues and you think your code is correct come see me! This particular CBT is tough for AutoGradr to deal with. What do you need to work on... 1. Reading in User input and then using that same input as part of your output. 2. I will need you to write 2 programs. 1. Will take the original CBT, go ahead and add the same inputs Brick, 25 and so on. 2. Copy the output on your terminal screen and print that output using a series of print statements in Autogradr. 3. Provide each code in your PDF and the checkmark in autogradr.

Test Case

Console

```
1   Hello. What is your name? Brick
2   Hi, Brick! How old are you? 25
3   So you're 25, eh? That's not old at all.
4   How much do you weigh, Brick? 192
5   192.0! Better keep that quiet. Finally, what's your income, Brick? 8.75
6   Hopefully that is 8.75 per hour and not per year!
7   Well, thanks for answering my rude questions, Brick.
8
```

Help   Java 8 ▾   Run Code

```
1   import java.util.Scanner;
2
3   public class Main
4 - {
5       public static void main(String[] args)
6 -     {
7           System.out.println("Hello. What is your name? Brick");
8           System.out.println("Hi, Brick! How old are you? 25");
9           System.out.println("So you're 25, eh? That's not old at all.");
10          System.out.println("How much do you weigh, Brick? 192");
11          System.out.println("192.0! Better keep that quiet. Finally, what's your income, Brick? 8.75");
12          System.out.println("Hopefully that is 8.75 per hour and not per year!");
13          System.out.println("Well, thanks for answering my rude questions, Brick.");
14      }
15  }
16
```

Hello. What is your name? Saket
Hi, Saket! How old are you? 17
So you're 17, eh? That's not old at all.
How much do you weigh, Saket? 375
375.0! Better keep that quiet. Finally, what's your income, Saket? 17.00
Hopefully that is 17.0 per hour and not per year!
Well, thanks for answering my rude questions, Saket.
