cases so make sure you program can do both cases

Test Case 1   Test Case 2

Console

```
1   Type the word "weasel", please.
2   You typed what was requested: true
3   You ignored polite instructions: false
4
```

Input Files
input.txt

❔ Help   Java 8   ⌄   Run Code

```
1   import java.util.Scanner;
2   import java.io.File;
3   import java.io.FileNotFoundException;
4
5   public class Main
6 ▾ {
7
8       public static void main(String[] args) throws FileNotFoundException
9 ▾     {
10          boolean y, n;
11          File inputFile = new File("input.txt");
12          Scanner scanFile = new Scanner(inputFile);
13          String word = scanFile.next();
14
15          y = word.equals("weasel");
16          n = !word.equals("weasel");
17          System.out.println("type the word \"weasel\", please.");
18          System.out.println("You typed what was requested: " + y);
19          System.out.println("You ignored polite instructions: "+ n);
20      }
21
```

✔ You passed 2 of 2 test cases

✔ Test Case 1   ✔ Test Case 2

✔ Passed

```
PS C:\Users\saket\JAVA\CBT> java CBT013BakshiSaket
Type the word "weasel", please.
weassel
You typed what was requested: false
You ignored polite instructions: true
